

Gorgomyte Fretboard Cloth

Product Code: 712

Availability: 3

Price: € 21,00?

Description

Original lemon oil formula.

Specially treated cloth loosens and removes dirt and oxidation fast, leaving frets shining like jewels and feeling great as well as fretless fingerboard of fretless instrument!

Weird name, but it really gets the job done! Gorgomyte® was developed by veteran guitar tech Jimmy Johnson as a nonabrasive, faster alternative to steel wool. Gorgomyte cleans and conditions fingerboards without leaving a sticky residue. Jimmy's proud to say Gorgomyte is used by more big-name touring bands than any similar product.

"I'm so used to great frets now it's hard to remember life before Gorgomyte!"

—Tommy Shaw of Styx

The 16 x 23 cm size means Gorgomyte is more economical and fresher when you're ready to use it. A new finer cotton weave helps it clean more efficiently, too.

Gorgomyte is environmentally safe, non-toxic and non-irritating to your skin. It's chemically treated with lemon oil to condition and enhance the beauty of fretboard woods. No need to mask off the frets.

After each use, just put it back again in the re-sealable sack to stay fresh for next use!
