Description

Absolutely Amazing and mindblowing workmanship from the Karimian's workshop. Everytime that i get his instruments in the shop, i wonder how good his instruments are. The eye for detail is at its highest possible grade as the sound of his instruments. And this oud is nothing less than that.

His bracing method has developed the sound on his ouds in a way that they really can conquer any larger size oud regarding volume & brightness.

The sound of this instrument is everything you would expect from an instrument of this class, amazing volume and headroom, responsive, nice rich balanced overtones, powerful projection and an amazing dynamic range.
